SUMMARY

Senior Software Engineer with over a decade of experience building scalable and reliable software systems, with a strong background in Go, distributed systems, and backend architecture.
I enjoy solving complex engineering problems, making pragmatic technical decisions, and taking ownership throughout the software development lifecycle. My experience spans multiple industries, with a focus on building maintainable systems that deliver long-term business value.

WORK EXPERIENCE

Nov 2024 - Current
Senior Software Engineer at Celonis

Working in the development of a product for code-less business flow automation, with microservices written in Go, PostgreSQL as storage, RabbitMQ for communication between services and temporal.io for handling workflows.

Nov 2022 - Nov 2024
Senior Software Engineer at Emporix

Working in the development of a product for code-less business flow automation, with microservices written in Go, MongoDB as storage, Nats for communication between services and temporal.io for handling workflows.

Nov 2021 - Nov 2022
Senior Software Engineer at The Hotels Network (THN)

Development of a system to collect data from different sources in real time, using Go, MongoDB and RedPand for communication between services.

Feb 2021 - Nov 2021
Senior Software Engineer at Mercado Libre

Developer in the Productivity Engineering Team, working with microservices written in Go or Java, Events Queue and Docker

Jul 2019 - Feb 2021
Technical Leader at Fulljaus

I led the Fulljaus core development team working in PHP 7 and Symfony 3.4. Here I impulsed a refactor which reduced the integration time from at least 3 months to 1 months and I was an active part in the migration to Microservices written in Ruby on Rails. Also, my tasks as leader included deployments in production, watching for the stability in this environment and training new team members.

Jun 2018 - Jul 2019
Backend Developer at GeoPagos

I worked with php 7 and Symfony 2 in the development of the backend and the admin panel belonging to mPOS platforms.

Jan 2017 - Jun 2018
Magento Developer at Summa Solution

I work over PHP 5.6 with Magento 1 and over PHP 7 with Magento 2. I was in charge of the production deployments and site stability in some of the projects.

Sept 2017 - Dec 2017

QML Developer at Freelance for Iterway

I used QML to develop an app which consisted of a status machine to track the route and stops of trucks in the USA.

Mar 2016 - Jan 2017

Team Leader at Softtek

Besides the development tasks, I was in charge of the team management, our tasks were developing e-commerce plugins and SDK for the integration with TodoPago (payment aggregator) and Decidir (payment gateway).

Dec 2014 - Jan 2017

Integrations Developer at Softtek

I worked in the development and maintaining of different PHP based e-commerce systems plugins (like OpenCart, Prestashop and Magento) and different languages SDKs (like Php, Ruby and Java) for TodoPago (a payment aggregator) and Decidir (a payment gateway).

Sept 2014 - Dec 2014

Java Developer at Softtek

I was in charge of maintaining OSDE (an argentinian healthcare company) refund management system developed in Java with JSP and Spring.

SKILLS

PROGRAMMING LANGUAGES

Go (6 years) · PHP (6 years) · Ruby (1 year) · Java (1 year)

FRAMEWORKS/LIBRARIES — Go

Gin · Mongo Driver · Temporal.io · Samber/Do

FRAMEWORKS/LIBRARIES — PHP

Symfony · Doctrine

FRAMEWORKS/LIBRARIES — Ruby

Rails

DATABASES/STORES

MongoDB · MySQL · Redis

OTHERS

Kafka · RabbitMQ · Nats · Docker & Docker Compose · Kubernetes · Temporal.io · Scrum · GRPC

EDUCATION

Sept 2016 - Current

Information system Engineering at UTN

Ongoing study.

Apr 2015 - May 2016

English course at Pathway

BYU-Idaho (Brigham Young University) program.
